Rahul Sharma

MCA Student | Software Developer | Cybersecurity Enthusiast

Jamshedpur, Jharkhand, India | Email: rahul9947sharma@gmail.com | GitHub: github.com/Rahul9947

PROFESSIONAL SUMMARY

MCA student at Srinath University with an interest in software development, programming fundamentals, databases, Linux, networking, and cybersecurity. Building practical skills through coursework and personal projects.

EDUCATION

MCA (Master of Computer Applications) — Currently Pursuing
Srinath University, Jamshedpur, Jharkhand

BCA (Bachelor of Computer Applications) — Completed
Jamshedpur Co-operative College (Affiliated with Kolhan University), Jamshedpur, Jharkhand

TECHNICAL SKILLS

Programming: C, C++, Java, Python

Web Development: HTML, CSS, JavaScript, Flask

Database: MySQL, MariaDB

Tools & Technologies: Git, GitHub, VS Code, Linux, Termux, Android Debug Bridge (ADB)

Cybersecurity: Networking Fundamentals, Linux Fundamentals, Web Security Fundamentals, Security Testing Concepts, TryHackMe Learning

TECHNICAL PROJECTS

Wireless Phone Controller — Python · ADB · scrcpy · Windows · Subprocess API

A Python-based desktop utility that harnesses Android Debug Bridge (ADB) and scrcpy to control, navigate, and mirror an Android device screen wirelessly from a computer. Eliminates the need for continuous physical cable tethering by establishing authenticated TCP/IP connections.

- Wireless Android connection over local subnet
- Low-latency device control and input forwarding
- Real-time screen mirroring powered by scrcpy

Student Attendance Management System — Python · Flask · HTML · CSS · SQLite · Jinja2

A web-based attendance management project designed to streamline student registration, daily classroom attendance recording, and periodic attendance status reporting. Features persistent relational storage and an intuitive web interface for teachers and administrators.

- Student record management and section assignment
- Daily attendance recording with quick status toggles (Present/Absent)
- Attendance summary reports and percentage tracking

Student Management System — Java · File Handling · Serialization · OOP Architecture · Java Collections

A robust Java-based application engineered for managing student academic records. Implements object serialization and reliable file handling to ensure persistent record storage between execution sessions without external server dependencies.

- Add new student profiles with validation
- Persistent record storage via Java Object Serialization
- Fast record retrieval by student ID or name search

PROFESSIONAL EXPERIENCE

LR & Trip Department — Nov 2025 – Present
Saizar Enterprises Pvt. Ltd., Jamshedpur, Jharkhand
Working in the LR & Trip Department since November 2025.
